

POLAND

ZESPOL SZKOL LICEALNYCH

Zespół Szkół Licealnych (ZSL) is a school of secondary education in the south-east of Poland. We teach pupils aged 15-20 in “profiled” classes majoring in mathematics and/or IT, biology and chemistry, languages and humanities, military and medical emergency. Moreover the school also has 3 types of technical classes specializing in shipping, logistics and economy. The school is over 100 years old and it is quite big. At the moment there are 1541 pupils and 121 teachers.

ZSL also functions as a boarding school for 130 pupils who live too far away to commute daily. It offers numerous sporting facilities, a canteen, a concert hall and a library.

TURKEY

ADNAN MENDERES ANADOLU LİSESİ

Adnan Menderes Anadolu Lisesi is located in the city center of Balıkesir. The city has coasts to both Marmara and Aegean Sea. There are 740 students, 45 teachers and 6 assistant personnel in our school. There is a dormitory for girls with a capacity of 170. We have 2 eTwinning and three Erasmus+ projects in our school, which are about multiple intelligences and social inclusion. Some activities such as social responsibility projects, folk dance clubs, drama clubs are organized to increase academic achievement and social competences of our students and from time to time we organize poetry nights inviting some poets. The school has football, handball and volleyball teams and students take part in some sport organizations like wrestling, Taekwondo, swimming and athletics. By our Erasmus+ project "Hold Everyone Together" we hope that our students will develop skills and competences which will be necessary for now and future.

SERBIA

GRAMMAR SCHOOL

'9.MAJ'

Grammar School '9.maj' is the youngest of the four grammar schools in Nis, Serbia. Situated in a peaceful part of the city centre, our grammar school is accessible to everyone and, at the same time, close to all relevant educational and cultural institutions. The building is old but has seen many renovations so now in it there are 30 well-equipped classrooms, the staff room and the gym. Every day more than 700 students and almost 90 teachers and staff members spend their time in it exploring various subjects, discussing burning scientific and social issues and finding solutions to different problems. Our school is famous for its specialized classes for talented athletes and future IT professionals. Our students, who are our greatest asset, have participated in numerous competitions and projects and our student parliament has organized various humanitarian activities and events with the aim of helping people and children in need. All of us who have invested our effort, time and knowledge in improving our school are proud of the spirit it cherishes, our students' achievements and success in their further education and life choices.

ROMANIA

LICEUL TEHNOLOGIC ADMINISTRATIV ȘI DE SERVICII "VICTOR SLĂVESCU"

Technological Highschool "Victor Slăvescu" Ploiești is an educational unit, established in 1998, which educates students in the economic profile, the educational offer being completed in 2012 with the specialization mathematics informatics, intensive informatics. The school population of the unit now stands at 1,000 students, with an average of 520 pupils who live outside the city, graduating each year (100% graduation of the pupils in terminal classes, 100% passing the professional skills certification exam at all levels, approximately 94% graduation at the National Baccalaureate Exam). Our vision is: to develop a modern open education, able to provide access to all levels and forms of education, to ensure the motivation for a high-quality educational process which is meant to stimulate creativity, to liberalize and democratize student - teacher relationships, to encourage teamwork and develop the collaboration with the local community.
